GENERAL INFORMATION

SELECTION OF COLOURS:

While selecting colours, the artist should study the suitability of colours to his/her purpose. It is advisable to always go through the instructions on the pack. Using colours which are not suitable for his/her purpose may give unsatisfactory results.

Any unconventional use of colours on any unconventional surface may be undertaken by the artist at his/her own risk. The company will not be in a position to offer any compensation in such cases. Any product with a manufacturing defect with respect to raw materials or workmanship may, however, be replaced with a good product. It cannot be extended to "compensation for the work spoilt due to use of the defective product."

PERMANENCY RATING FOR COLOURS:

No form of permanency rating for colours can be absolute. Permanency may vary for various internal and external reasons. Permanency ratings are mentioned in the catalogue/products in order to assist the artist in selecting appropriate colours for his/her specific purpose. Mentioned here are the 'three levels of permanency.'

Permanency rating A: Absolutely Permanent Colours
Do not fade in mass tone, wash or glazing, but register negligible fading in reduced tones.

Permanency rating B: Permanent Colours
Show no signs of fading in mass tone, wash or glazing, but register fading in reduced tones.

Permanency rating C: Durable Colours
Show very slight fading in mass tone. The fading is more in wash and glazing, appreciable more in reduced tones.

Transparency rating:

| | |
|--------------------|---|
| Opaque | ■ |
| Semi – transparent | ▣ |
| Transparent | □ |

For details, refer to the shades cards

MEANING OF 'HUE'

The use of word 'HUE' denotes that a substitute pigment has been used in place of the traditionally used artists' pigment. This is done in case the cost of the original pigment is prohibitive or if it is very toxic. Sometimes the alternative pigment is also introduced to increase the permanency of the colours.

DETERIORATION OF PAINTINGS – FACTORS

Light: Discolouration and yellowing of varnishes is mainly an action of light, more so of ultra-violet rays. Paintings are at a greater risk and should be protected by glass. It is advisable to place paintings where they are not exposed to direct sunlight. Lights bounced from open grounds and water bodies also harm the paintings in a similar manner.

Heat: Heat accelerates oxidation within the paint and varnish. Comparatively lower temperature is better for the painting and large fluctuations in temperature are not desirable.

Humidity and Dampness: Extreme humidity and dampness can cause fungus whereas extreme dryness contributes to internal stress in paintings. Humidity control is as important as temperature control for good life of paintings.

Paintings should not be stored in damp conditions where fungus can grow. Paintings should always be stored a little above the ground and away from the wall. Paintings should not be hung on the external walls. They should always be hung in a manner that there is air movement behind the paintings.

CLEANING OF PAINTINGS:

Paintings can be cleaned of dust with a soft dry flat brush if the dust accumulated is not much. A simple way to avoid the build-up of dust is to incline the painting with the top leaning forward of the bottom when it is hung on the wall. Periodic cleaning with good picture cleaner would keep the colours bright and fresh. For removing dust and soot, vacuum cleaner can be used.

Using a Backboard: This is a very effective way of protecting the paintings. Backboard reduces the harmful effects of moisture and dust.

TOXICITY TESTS:

As a member of the Art & Creative Materials Institute Inc. Boston, USA, most of our art materials have been evaluated by the institute in accordance with chronic hazards labeling standard under auspices of The American Society for Testing and Material (ASTM). Kokuyo Camlin products are classified either among those for which "no health label is required", as they do not contain any toxic material or others requiring a "health label with hazards warning."

Relevant labels appear on the products evaluated by the institute.

1. For a Non-Toxic Product

2. For a Product with a Toxic ingredient

Similarly most of the school products conform to EN 71-3 European Standard which means that these products are Non-Toxic and safe for children to use.

CARE OF PAINTINGS:

Paintings are creative works made by emotionally charged professionals with many complex chemicals and hence may deteriorate if not mounted, housed, or maintained in a proper manner. We are therefore offering some suggestions on the subject for the benefit of the buyers. These suggestions are given with the best of our knowledge and experience and are in absolute good faith. The readers are requested to use their own discretion or consult an art restorer in case of need. Please note that the company will not be liable in this regard.

- For long life of the painting, it is desirable that it is made on good quality acid free paper or acid free canvas.
- The painting on paper should be glass framed with proper mount to provide breathing gap between painting and glass.
- While glass framing paintings use acid free mount and back-up boards to ensure long life of paintings.
- The canvas should be stretched properly to ensure that the colour film is neither overstretched nor slack.
- Varnishing does help in protecting the painting from various pollutants.
- The paintings should be housed in a well ventilated place with neither direct nor bounced sunlight falling on it.
- The wall on which the painting is hung or stacked should not be damp. Please avoid external and bathroom walls.
- Clean the paintings regularly with soft tissue and ensure that dirt and soot is not deposited for a long time.
- Don't touch the paintings with dirty, oily hands or after eating food as it may invite fungus formation.
- Don't clean the paintings with the cloth used to clean furniture, wall or floor.
- The canvas stretchers should be adjusted accordingly to facilitate shrinkage and expansion of the canvas during change of weather.
- Periodically the paintings should be vacuum cleaned to get rid of dirt, soot, etc. especially deposited on the reverse side of painting and between canvas and stretchers.
- In case any deterioration is spotted, please contact any qualified restorer.

CARE AND PROPER USE OF ART MATERIAL:

Art Material is essential for the artists to convert their dreams into images. The better they are cared for, the better would be the end result. Here are few tips for better care of the artists' material;

- Always squeeze the tubes from the bottom to avoid drying & wastage of colours.
- Keep the tubes properly capped after taking out the colours.
- In case of bottles and jars, don't put the brushes in the colours. It is better to take out the required amount of colours on the palette with a knife or spoon.
- Lightly rub the canvas with a fine emery paper to ensure better acceptance of colours.
- Mediums are very important for the look and life of colours. Use proper medium considering the pigment and application in mind.
- Uncontrolled turpentine can play havoc with the feel, finish and life of the oil colours, especially in earth colours hence due discretion is required using turpentine with oil colours.
- Acrylic colours are water soluble but water is not the medium for Acrylic colours. Use a proper medium considering the look and texture desired.
- Tap water should be avoided while painting with Acrylic Colours as it may be contaminated and cause issues like fungus or discoloration.
- Varnishing is helpful in preventing the pollutants affecting colours causing deterioration of the painting. However, it is very important that the painting is 100% dried before varnishing.
- Brushes are very important tools for the artist and hence must be cared well. It is better to use a proper brush washer than putting them in any jar directly.
- Kerosene should be avoided for washing brushes as it may harm the colour film.
- After initial cleaning with turpentine or water, as the case may be, it would be better to wash brushes with soap and water for thorough cleaning.
- Brushes must be thoroughly dried before storing in a jar or box.
- Keep some naphthalene balls in the brush jar for added protection.

The Camel's Journey (Since 1931)

India was enveloped in the Swadeshi movement. The sentiment for using Indian made goods ran high. People were looking for modern Swadeshi (Made in India) options to foreign goods which had flooded the Indian market.

1931

Mr. D.P. Dandekar, a chemistry graduate and struggling to earn a living in the city of Mumbai (Bombay), was fired by the Swadeshi movement. He decided to plunge into manufacturing and give a home-made option to the people of India.

An absolute scarcity of resources did not make his task any easier. His first manufacturing unit came up in the living quarters of his elder brother and mentor Mr. G.P. Dandekar in Girgaum, Mumbai. The first product was Horse brand ink powder - easy to pack, and very economical too. It was a success. The success of ink powder was repeated by Camel Fountain Pen Ink, the next product in 1933.

Dandekar & Co. was rechristened as Camlin - a combination of Camel and Ink. The 'Camel' was selected as a symbol because it represents a hardy animal capable of enduring long and tough journeys across deserts. 'Camel' was also easy to write and pronounce in all Indian Languages and was acceptable to all religions of the land. Camlin soon moved into a brand new centrally located office and factory at Mahim (Mumbai).

1946

1947

Independence and the beginning of the Camel era. From inks, the product range expanded to pain balms, chalks, rubber stamp pads, gums, adhesives and a range of stationery products. Simultaneously, a distribution network was being set up to reach across the length and breadth of the country.

1958

Silver jubilee year. Celebrated with great enthusiasm in its own factory and office at Andheri, (the most industrialised suburb of Mumbai), which is now the Head Office for all divisions.

1962

Camlin entered the art material market with the launch of quality products for professionals and students such as oil colours, water colours, poster colours, wax crayons, oil pastels and geometry box.

1964

Formal inauguration of the Art Material Division. Camlin soon became a market leader in India in stationery and art material, a position enjoyed even today. Excellent product quality, extensive network and innovative marketing techniques like participation in exhibitions, conducting contests and workshops for children, hobby painters and professionals have popularised these products that have made Camlin a respected household name.

1974

Consequent to the decision to look beyond the frontiers of India, manufacturing and marketing operations began in Malaysia in collaboration with the State Government 'Negari Sembilan'.

As per the agreement, the manufacturing plant was handed over to the local partners after a stipulated period.

1984

A year of diversification. The Camlin Fine Chemical & Pharmaceutical Division was born. A new integrated ultra-modern plant was started in the Tarapur premises to manufacture bulk drugs and anti-oxidants for the global market.

This period also saw the introduction of wooden pencils. A fully integrated factory was started in Tarapur (100 Kms from Mumbai) for manufacturing wooden pencils.

1987

Camlin became a Public Limited Company and was listed on the Bombay Stock Exchange.

1989

Technical collaboration was done with Pilot Corporation, Japan to manufacture 0.5 mm high polymer leads.

1994

The opening of Nashik factory for manufacture of pharmaceutical formulation which has been operating successfully since then.

1995 Camlin Industrial Adhesives Division started its operations.

CAMEL ART FOUNDATION

WELCOME TO KOKUYO CAMLIN LIMITED

KOKUYO GROUP

Kokuyo Group is over a century old Japanese business house founded in 1905 in Osaka, Japan. Starting as book cover makers for "Wacho" (traditional Japanese account books), Kokuyo today is a ₹17,600 Cr. group with business spread all over Asia, Europe, and with offices in China, Hong Kong, Thailand, Singapore, Malaysia and Vietnam.

The main product lines include office stationery, especially notebooks, office supplies and office furniture. The company is officially listed in Osaka & Tokyo stock exchanges. The company's flagship brand is Kokuyo which is a household name in office stationery products and furniture. in Japan.

CAMLIN LIMITED

Like Kokuyo Group, Camlin too has been in existence for more than 83 years and has a rich legacy and proud history of its operations. Way back in 1931, it started manufacturing Horse brand ink powders and tablets followed by Camel Inks which eventually lead to the creation of its flagship brand Camlin in 1946. Over the years, Camlin has expanded into art material, scholastic materials, hobby products, office stationery products, and corporate gifts, Camlin is one of the most trusted and renowned brands in India with over 2100 products and a reach of over 5.5 crore households.

KOKUYO CAMLIN LIMITED

Synergy Strength Success.

In May 2011, Kokuyo and Camlin came together to create Kokuyo Camlin Ltd, Kokuyo S&T Company Ltd. a wholly owned subsidiary of Kokuyo Ltd, acquired a controlling stake in Camlin Limited from the promoters. The name of the company has now been changed to Kokuyo Camlin Ltd.

With a sharp focus and a clear goal to leverage existing strength and presence, Kokuyo Camlin Ltd is all set to begin a new chapter in the stationery business. The expertise, reach and brand equity of Camlin will be supplemented with Kokuyo's innovative new office stationery products, world-class R&D and strong presence in Asian geographies.

Going forward, as the two legacies and leaders come together, their synergy will lead to more strength and more success.

Artists' Acrylic Colours

Camel Artists' Acrylic Colours are soft, creamy, and are a golden mean between water colours and oil colours. They can be used directly from the tube or mixed with acrylic medium or with water. Relief texture can be obtained by application of thick paint with palette knife and large areas can be built up without fear of cracking. They adhere to a great variety of surfaces like canvas, wood and earthenware and are available in 60 shades.

Premium Poster Colours

The premium range of Camel Premium Poster Colours are ideal for a smooth matt finish and a completely opaque mass tone. Made from the finest pigments, they give high covering capacity with a brush or a spray gun. They flow easily, evenly dry, quickly and are easy to mix. Camel Fluorescent Poster Colours give brighter artworks and superior visual impact. These must be carefully used as they are moderately permanent and lose their brilliance on intermixing. Camel Premium Poster Colours are available in 54 shades.

Painting Medium

Painting Medium

Colours are required to be thinned to the desired viscosity. An artist has to use a medium enhancing the binding power of the colours, without affecting the brilliance.

MEDIA TO BE USED DURING PAINTING

CAMEL PURIFIED LINSEED OIL

Camel Purified Linseed Oil is a suitable medium for oil painting. It is doubly-refined to remove all wax impurities to produce a very clear liquid, which does not react with or change the shades of the colour used. It adds flexibility to the oil colours.

| Product No. | Description |
|-------------|---------------|
| 0519901 | 60 ml bottle |
| 0538901 | 500 ml bottle |

CAMEL ARTISTS' DRYING OIL

Camel Artists Drying Oil is linseed oil treated with scientifically developed drier to shorten the drying time. It is fully compatible with other oils.

| Product No. | Description |
|-------------|---------------|
| 0519904 | 60 ml bottle |
| 0538904 | 500 ml bottle |

CAMLI – GEL

Camli – Gel, when mixed with an oil colour renders a non – chalky fresh effect on the painting by increasing the gloss and transparency of oil colours. It improves weather resistance, accelerates drying and prevents uncontrolled running of colours.

| Product No. | Description |
|-------------|-------------|
| 0523905 | 100 ml jar |

CAMEL DISTILLED TURPENTINE

Camel Distilled Turpentine is an organic solvent, specially re-distilled and treated to quicken drying of oil colours. It is a thinner for oil colours and is also useful as a cleansing agent for brushes.

| Product No. | Description |
|-------------|---------------|
| 0519909 | 60 ml bottle |
| 0538909 | 500 ml bottle |

MEDIA FOR PREPARATION OF PAINTING

CAMEL TEXTURE WHITE

Camel Texture White is a multipurpose resin impasto medium, good for relief work or collages on canvas and wood. As it dries quickly and does not peel off, it serves the dual purpose of padding and lining.

| Product No. | Description |
|-------------|---------------|
| 0523915 | 100 ml bottle |
| 0538915 | 500 ml bottle |
| 0543915 | 1 litre jar |

CAMEL GESSO

Camel Gesso is an ideal primer to prepare a wide range of surfaces like fabric, wood, board etc. for oil and acrylic painting. It is fast drying and opaque. It provides non-porous, non-flaking stretchable ground for paints.

| Product No. | Description |
|-------------|---------------|
| 0538945 | 500 ml bottle |
| 0543945 | 1 litre jar |

MEDIA FOR PROTECTION OF PAINTING

CAMEL PICTURE VARNISH SPRAY

A protection solution for the artist of today. Camel Picture Varnish Spray offers the safety of the painting with a lot more convenience. Made in India for the first time, the Picture Varnish in a spray container is economical too. This varnish could be applied on both oil as well as acrylic paintings. Use the varnish spray holding it at a suitable distance from the paintings after they are completely dry.

| Product No. | Description |
|-------------|--------------------------|
| 530913 | 200 ml Aerosol Tin Spray |

Painting Medium

CAMEL PICTURE VARNISH

Camel Picture Varnish is a post painting coat for oil paintings. After allowing the oil painting to dry for 6 to 12 months (depending on the temperature and weather condition), a coat of picture varnish will not only protect the painting but also impart a gloss to it.

| Product No. | Description |
|-------------|---------------|
| 0519910 | 60 ml bottle |
| 0538910 | 500 ml bottle |

CAMEL FIXATIVE SPRAY

Camel Fixative Spray is a much-needed protection solution for all the dry drawing media. Suitable for a variety of media like soft / dry pastels, charcoal, oil pastels, pencils, crayons, etc. The Camel Fixative will form a transparent non-removable protective film on the surface after drying.

| Product No. | Description |
|-------------|--------------------------|
| 0530933 | 200 ml Aerosol Tin Spray |

CAMEL ARTISTS ACRYLIC MEDIA

CAMEL ACRYLIC GEL MEDIUM

A translucent paste for impasto, glazing and texturing. Dries quickly to a water resistant finish. Increases transparency and gloss.

| Product No. | Description |
|-------------|---------------|
| 0523920 | 100 ml bottle |

CAMEL ACRYLIC GLOSS MEDIUM

A slow drying, thinning medium for Acrylic colours. Increases gloss, flow, and transparency.

| Product No. | Description |
|-------------|-----------------------------------|
| 0523922 | 100 ml bottle (Pack of 5 bottles) |
| 0538922 | 500 ml bottle |

CAMEL ACRYLIC MATT MEDIUM

Quick drying thinning medium. Gives matt finish.

| Product No. | Description |
|-------------|-----------------------------------|
| 0523923 | 100 ml bottle (Pack of 5 bottles) |
| 0538923 | 500 ml bottle |

CAMEL ACRYLIC RETARDER

It retards drying time of acrylic colours. Does not change consistency or texture of colour and increases transparency.

| Product No. | Description |
|-------------|-----------------------------------|
| 0523921 | 100 ml bottle (Pack of 5 bottles) |

Canvas & Easels

Easels

Camel Easels are made out of the best quality wood from renewable sources and hence are eco-friendly. To ensure the stability, the wood is seasoned by the process of kiln drying. With innovative designs, these easels provide a stable support for painting. The small, but versatile range, offers solution to a wide range of support requirements of the artists. These premium easels are made of bamboo, hence are eco-friendly as well as superior on weight, finish, stability and life. These easels are presented in various designs to suit various needs of the artists. Metal easels are used by the artists in an outdoor setup, as these easels are durable and lightweight.

Canvas

The quality of canvas is as important as the quality of colours in a painting. So, the utmost care is taken in the manufacture of Camel Canvases. Using specially produced superior quality cotton and poly-cotton fabrics, they are coated with a resin emulsion to prevent absorption of colours. Camel Canvases are available in rolls or pasted on hard boards or stretched on wooden frames.

Cone liners

CAMEL FABRICA CONE LINERS

Camel Fabrica Cone Liners create colourful 3-D designs or graffiti on fabric. They can also decorate non-fabric surfaces like canvas, wood, earthenware, thermocole etc. All you have to do is to shake the bottle, tap it gently on hard surface without removing nozzle cap, and start making the pattern from the nozzle directly. You could use Fabrica Cone Liner by itself or for outlining / highlighting designs painted with Fabrica Colours. Available in 26 Shades in 3 varieties: Ultra, Pearl, and Metallic.

All these colours are permanent on absorbent surfaces. Test their suitability on synthetic fabrics. All Shades are available in 20ml squeeze bottles.

| 2043772 | Speciality Brushes – Deer Foot |
| 2045772 | Speciality Brushes – Liner |

Dagger

Cat's Tongue

Angular

FILBERT: This brush can be used in place of flats for broad coverage and in place of rounds for detail work by turning it on its side. It reduces the requirement for the artist to stop and switch brushes to achieve different effects.

DEER FOOT: This brush is used to dab on the paint in dry brush technique to simulate flowers, pods, grass, hair and texture.

LINER: These brushes are used for lettering, for branches and fence wire in landscape and many other fine line uses.

DAGGER: This brush is used for thin lines as well as for painting single stroke petals and leaves.

CAT'S TONGUE: The point of this brush can be used for fine lines, with the side for medium strokes and with the flat side of the brush for washes and large areas. They can be used in both lettering and washes.

ANGULAR: These brushes have an angled edge and are used for curved and varying width strokes. The artist can also paint flat while holding the brush at an angle.

Filbert

Deer Foot

Camel Art Foundation

Camel Art Foundation (CAF), the philanthropic wing of Kokuyo Camlin Limited, has substantially contributed to the growth of art, artists, art appreciation and art education in India.

To celebrate the spirit of art, this non-profit organisation holds four art exhibitions each year, in the Northern, Southern, Eastern and Western regions, and plays host to more than 12,000 professionals and art students.

Since its inception in 1998, CAF has received 60,000 entries, held 55 regional exhibitions, awarded around 600 winners and sent over 130 EuroArt winners on an all-expense-paid trip to visit art galleries and museums in Europe.

Though the foundation's main objective is to promote art activities and create a platform for budding artists, it also provides an opportunity for professional artists to become popular and look beyond the Indian art scene.

Besides getting an opportunity to display their work, the artists with the best paintings are also rewarded with grand prizes from Kokuyo Camlin Limited. The entries, categorised into professional artists and students, are sub-divided by the art media like Oil, Water, Acrylic and Drawing and Pastels. The contest is open to all participants above 18 years of age.

The first selection is done on the basis of photographs. The selected artists are then informed to send the original paintings across. The final judging is done on the original paintings and with the resume of the participant. The painting should not have been exhibited earlier.

Camel Art Foundation

The panel of judges comprise Artists and Art faculty from the states of that particular region for a fair selection. It is very taxing for the judges to go through this judging process twice but there is always some element of surprise for them in the process.

The selection is done

- a) For award-winning entries
- b) For exhibition

A catalogue is prepared for all winning and exhibited entries. The paintings are sold if the artist wishes so, and the entire amount is handed over to the artist. Kokuyo Camlin Limited does not keep any commission for the Foundation.

After the exhibition, the remaining paintings are returned to the artist through distributors or collected by the artist on the last day of respective regional exhibitions.

The entry forms are available with all Fine Art Dealers across the country as well as on the website www.kokuyocamlin.com, link Camel Art Foundation. The annual contest is launched around May/June every year. Receipt of entries closes around September / October annually.
